

PRODUCT LINE CARD

ForceField® GRIMEBLASTER™ ALL PURPOSE CLEANER & DEGREASER- Versatile powerful concentrate that solves practically all cleaning and degreasing jobs. Our heaviest duty medium foam formula. This universal non-butyl product combines the best biodegradable water based detergent chemistry with a powerful solvent system to provide excellent all around performance. High dilution formula provides super effective heavy and light duty cleaning and is excellent for use as a pressure washing compound, steam cleaner, scrubbing machine solution, for concrete cleaning, or by hand application when properly diluted. Unique combination of biodegradable detergents, surfactants, and grease dissolving chemicals cut through and remove heavy deposits of baked on carbonized grease, oils, wax, gums in addition to degreasing. Contains no toxic chemicals or agents; non-abrasive and phosphate free. Safe on painted hard surfaces. A most versatile product for use by factories, schools, municipalities, maintenance operations, auto, aircraft and railroad, etc. Cleans engines, parts, painted and unpainted machinery and equipment, painted woodwork, whitewall tires, concrete, shop floors and much more.

ForceField® TAR-X Industrial Solvent- Biodegradable advanced technology formulation. Premium, fast acting, multi-purpose liquid cleaner and degreaser. Unique combination of proprietary dissolvents and surfactants cut through and dissolve problematic soils such as grease, oil, tar, asphalt, creosote, gear oil, adhesive, tree sap, resin, glue and much more. Unsurpassed in rapidly removing asphalt and tar from equipment and tools; degreasing engines and engine parts, molds, dies and other industrial equipment; degreasing small parts in immersion applications. Mild pleasant odor. Low foaming. Easy rinsing. Contains no toxic solvents, free alkalies, acids or abrasives.

Fire Ant Injector Spray II- Aerosol fire ant killer with 36" extension tube. Immediately kills the entire mound including the queen.

Demise Powdered Pyrethrin Insecticide- Kills insects by dehydrating. Great for fire ants. Kills all insects with no possibility of immunity. Powder continues to work as long as it does not get wet. Does not conduct electricity so it is ideal for mechanical devices where ants, spiders, wasps, etc. tend to form nests to escape the environment such as control boxes, irrigation clocks, signal cabinets, dry wells, etc.

Barren Soil Sterilant- Petroleum, bromacil and 2-4D for areas where bare ground is needed all year. Use straight, a light amount is all that is required. Unlike most weedkillers, reapplication will not be necessary until the following spring. Ideal for fences, right-of-ways, rail spurs, electricity substations, etc.

Safe-React Formula E (For Etching Concrete and as a General Replacement for Muriatic Acid)- Designed as a direct replacement for muriatic acid. Safe for workers, but reacts like an acid. One popular application is concrete finishing applications. Also effective for pH adjustment, industrial descaling, cleaning heat exchangers and many other jobs that normally require hazardous acids. DOT Non-HazMat.

Wash & Wax- Liquid automotive cleaner concentrate contains seven different water conditioners that attack road grime, bugs, bird droppings and more and release these soils from vehicle surfaces. Leaves behind a wax-like film that gives the appearance of a hand wax treatment. Tough on dirt but mild on paint.

Heavy Duty Penetrating Oil- Unmatched performance and non-flammable. Frees rusted and corroded nuts, bolts, studs, set screws, aluminum and copper fittings. Displaces moisture, penetrates through grease, soil, and sludge. Lubricates and prevents corrosion.

Safe-React Graffiti Wipes- Perfect for removing graffiti from road signs. Removes paint, marker, ink and other graffiti in one easy step from hard surfaces. Safe for hands also. Non-toxic, non-flammable and non-hazardous; no harmful or nauseous fumes. Abrasive yet non-scratching fabric aids in cleaning. These towels work safely on partitions, stainless steel, phone booths, desks, aluminum siding, billboards, lamp posts, wall tile, road signs, lockers and almost any hard surface.

Other Graffiti Removers- Biodegradable nonhazmat liquid graffiti solvent (technological miracle); Traditional gelled aerosol graffiti remover

Insect Repellent Towellettes- Convenient wipes with over 14% DEET premoistened and aloe-enhanced. Wards off the most bothersome biting insects and flies.

Safe-React 100% D-Limonene- All-natural, non-petroleum, concentrated solvent derived from oranges. Superb asphalt, tar and road oil solvent. Cleans patching and paving tools and equipment. Also, for sewage and wastewater applications, this is the strongest, longest-lasting odor control and grease eliminator available that is safe for the environment. Excellent for pit toilets, lift stations, wastewater plants, lagoons, garbage containers, grease traps, rv dump stations and more. Safe and effective as a parts washer solvent.

OGS Oven, Grill & Smokehouse Cleaner- Concentrated alkaline oven and grill cleaner. Save time cleaning flat grills, ovens, charcoal grills, fry vats, etc.

Calcium Chloride Pellets-- Provides fast and effective exothermic ice melting in temperatures down to -50 F. Works 36 times faster than rock salt; dustless to minimize tracking and residue problems on carpets and floors. Also stabilizes gravel and dirt roads.

Green Fire- Granular ice melter enhanced with a green color indicator to prevent over application and waste. It works in temperatures below 0-degrees Fahrenheit and will not harm concrete, asphalt or the surrounding plants and soil when used as directed. Does not leave residue on carpets and floors.

EZ Release- Asphalt release agent. Provides a thin, heat-resistant molecular film to keep asphalt from sticking to dump beds, rollers, rakes, shovels etc.

All Season Diesel Fuel Stabilizer- Improves performance and cold weather starting; stabilizes fuel for long-term storage; contains an anti-gel agent; lowers exhaust emissions; improves cetane; 1:1000 dilution ratio, may be used in bulk storage or vehicle.

Moto Guard Oil Conditioner- Improved highly viscous oil conditioner that is fortified with superior oxidation inhibitors to lengthen oil life, increase viscosity, reduce blow by, improve compression and decrease wear and oil consumption in internal combustion engines

We offer a full line of premium lubricants available for any application. If you are changing bearings, pins, u-joints, chains, or rebuilding gearboxes in any of your equipment, let us recommend one specialized product in your most problem area. It will prove that the slightly increased cost of our lubricants (compared to store grade) is tiny compared to the huge parts and labor cost savings. Some of our most popular lubricants are:

ShieldLube Super Impact Grease- 65 timken high pressure load, tackifiers added, non-melt and waterproof.

ShieldLube Premium Gear Oil-- Climbing high pressure lubricant with cohesive agents for maximum protection. Lubricates upper and middle gears and leaves a film to prevent dry starts. Non-foaming, will not emulsify with water. Reduces operating temperatures and power consumed.
