

ForceField® Leather Cleaner & Conditioner

OVERVIEW

ForceField® Leather Cleaner & Conditioner is a specially formulated product that is designed to clean and revitalize finished leather surfaces. It replaces the natural oils in the leather, cleans, and helps to hide surface scratches, cracks, or scuffs. In addition to restoring the supple feel and maintaining the natural beauty of leather, ForceField® Leather Cleaner & Conditioner helps to extend the life of finished leather.

HOW & WHY FORCEFIELD® LEATHER CLEANER & CONDITIONER WORKS

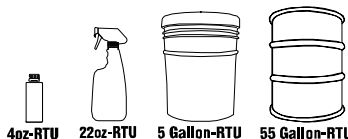

ForceField® Leather Cleaner & Conditioner represents a novel approach to leather care that recognizes the unique properties of this natural material. Specially developed glycerides help to lift and remove dirt and grime while imparting softness, surface protection, and added lubricity to the leather. Emulsified natural oils act to deep clean, and provide leather surfaces with a clear protective film. Finally, a high-tech nonionic liquid polymer emulsion additive allows the surface to be buffed to a glossy finish that has a flexible, soft, and luxurious feel. In every aspect, this product has been formulated specifically for finished leather.

APPLICATIONS

Always test for compatibility with, and the colorfastness of, the surface to be cleaned by applying a small quantity of the product to an inconspicuous area. ForceField® Leather Cleaner & Conditioner can be used on leather furniture, accessories, shoes, handbags, auto interiors, or other finished leather surfaces. It should not be used on suede or nubuck leathers.

Spray ForceField® Leather Cleaner & Conditioner evenly over the leather surface. Wait approximately 10 minutes, and then remove any excess product using a clean, dry, and colorfast cloth. Gently buff the treated area. It should be noted that two light applications are preferable to a single heavier application of ForceField® Leather Cleaner & Conditioner.
