

Forcefield® Pet SpotBlaster™

Bio-Enzymatic Urine Stain & Odor Eliminator

OVERVIEW

Pet SpotBlaster™ Bio-Enzymatic Urine Stain & Odor Eliminator is specifically designed to eliminate difficult to remove acidic and organic pet stains. Our bio-enzymatic odor neutralizing formula goes to work immediately, releasing active bacteria to digest ammonia residue left behind in pet urine and other organic materials. While many stain cleaners contain damaging oxidizing agents that can bleach the color of the carpet or upholstery along with the stain, **Pet SpotBlaster™** uses a different approach. It is effective on water based and oil based spills and stains. Use on carpets, rugs, upholstery, pet beds/carriers, cushions, vinyl and more. Excellent on concrete and other porous surfaces.

HOW & WHY PET SPOTBLASTER™ WORKS

Pet SpotBlaster™ combines three distinct chemical actions: stain reduction, odor neutralization, and anti-re-soiling. While many stain cleaners contain oxidizing bleaching agents that can bleach the color of the carpet or upholstery along with the stain, **Pet SpotBlaster™** uses a different approach. A special stain-reducing agent eliminates stains without affecting the color of the fabric. The odor neutralizer enzymes actually bind to the odors, preventing them from entering the air. And, finally, a special polymer has been incorporated into this product to prevent re-soiling. This polymer actually blocks the sites where soils and stains attach to the fibers, acting as a re-soiling barrier.

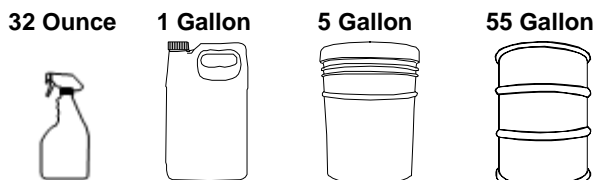

APPLICATIONS

Pet SpotBlaster™ can be used in homes on carpets, rugs, upholstery, draperies, pet beds, pet carriers, and other fabric surfaces that have been stained by pet waste, spills, food, or other soils. **Pet SpotBlaster™** can also be used on automobile and boat carpets, cushions, vinyl surfaces, upholstery, and floor mats.

1. Remove loose or dry soil and blot up wet stains using a clean, white, absorbent, colorfast cloth or sponge.
2. Spray stained or soiled areas with **Pet SpotBlaster™**, wait for approximately 3 to 5 minutes, then, using a white absorbent cloth, blot up any excess moisture. Rinse cloth or sponge and repeat this step, if necessary, until the area is clean.

Hint: Gentle heat can help to draw out stubborn stains. Apply **Pet SpotBlaster™** and use a hair dryer while blotting or cover the treated area with a clean, white cloth and lightly iron.

Available in the Following Sizes

For additional information on safety precautions and ingredients, please [CLICK HERE](#).

- **Special Anti-Soiling Formulation (Keeps Carpet Cleaner Longer)**
- **Reduces Stain and Neutralizes Odors**
- **Non-Toxic, Solvent Free, and Bleach Free**
- **Safe for Nylon, Acrylic, and Other Synthetic Carpet Types**
- **Removes the Toughest Stains and Odors from Carpet, Upholstery and Draperies**
- **Convenient Ready to Use (No Mixing Needed)**

HMIS Health: 1 **Fire:** 1 **Reactivity:** 0

pH: 6.5 to 7.5

Solubility: Completely Water Soluble

Boiling Point: 100°C

Storage: Above 0°C, Below 50°C

Regulatory: Not Regulated

Appearance: Clear to Light Amber Liquid

Odor: Honeydew

Specific Gravity: 1.00 +/- 0.02 (8.34 lbs/gal)

Chemical Family: Formulated Blend

Caution: Keep out of the reach of children.

Caution: Keep away from eyes.
